

CERTIFIED ANESTHESIOLOGIST ASSISTANTS (CAAS)

WHO ARE CAAS?

Certified Anesthesiologist Assistants (CAAs) are highly-educated medical professionals who plan and deliver safety-focused, patient-centric anesthesia care.

WHAT DO CAAS DO?

CAAs - also called anesthesiologists - are instrumental in anesthesia care. They help coordinate and implement care before, during, and after surgery. CAAs practice exclusively within the Anesthesia Care Team (ACT) model to provide the highest levels of care possible.

WHY THE ACT?

The ACT is led by a physician anesthesiologist and supported by physician extenders. It ensures each patient receives the best, and safest, anesthesia care*.
